GTK-1.2 is a highly configurable, fast, and low-footprint GUI toolkit. GTK-1.2 is built using the C language, and therefore is completely portable and usable on any machine with a C compiler, including AmigaOS-compatible machines. The GTK library provides all the tools for creating cross-platform applications with your own styles and layouts, and integrates with many popular Linux and Unix software packages. GTK-1.2 includes a large set of widgets that can be used in

---

your applications. GTK-1.2 provides a foundation that can be extended for a great deal of your own style and customization. GTK-1.2 supports GTK-1, GTK-1.1, and GTK-2.0. It is platform independent and works on all major OSs: Unix, Linux, BeOS, Win32, Win95, Win98, OS/2, MacOS. GTK-1.2 is based on the highly portable library GLib, which was written to be compatible with many different libraries and programming languages. GTK-1.2 uses the native type system of the OS to perform all of its operations, rather than relying on any external libraries. "Shrek" is a classic animated and sometimes live action
