А: To launch GTA San Andreas and many other games from a memory stick, go to System Settings > System Settings > Memory card format > Memory card menu and press the "No" button. Then go to the Playstation icon on the PlayStation Home screen, press the "X" button and select the memory card. A: I'm not familiar with this PS3 software, but it sounds like it might do what you want. Q: Laravel - Make foreign key field optional I have a table called "Profiles" with a "signup\_id" field which is a foreign key of "Signups" table. When I sign up as a user, the user may either select a value from a dropdown or leave it blank. If the user enters a value in that field, the corresponding row in the Signups table will be created. I have a Profile model which has the following function:

```
public function signup() { // if they have left the signup_id field blank, don't do anything if
    (empty($this->signup_id)) { return; } // get the related signup $signup =
    Signups::findOrFail($this->signup_id); // make sure it's set if (is_null($signup)) {
```
